

Tamper Evident Security Seals for ATM Cassettes

ITW Envopak is a division of Illinois Tool Works Inc (ITW). Operating in 48 countries with more than 50,000 employees, ITW provides us with the backing of a multi-billion dollar manufacturing organisation.

Supplying security sealing solutions since 1958, ITW Envopak has a reputation for flexibility and innovation and is regarded as one of the world's leading manufacturers of security seals.

OMEGA SEAL – variable length pull-up seal

The smooth, thin tail of the **Omega Seal** combined with a metal insert allows for a tight, slip-less grip providing maximum security from a plastic seal.

Manufactured from polypropylene, the **Omega Seal** is available with or without a tearline and is designed to accept barcodes.

ATM SEAL – designed for use on NCR cassettes

The **ATM Seal** has been designed exclusively for sealing NCR cassettes. The simple construction of the seal lends itself to single handed application and it is manufactured with a tearline for easy removal by hand.

Sitting flush against the cassette itself, the seal is not subject to the breakage that may occur with Pull Up seals. The **ATM Seal** is designed to accept barcodes for speedy processing.
