

ATM Securpak

Re-usable Bag & Seal for ATM Replenishment

The market leader in the supply of tamper evident security products, ITW Envopak's philosophy is that **"Re-use is better than one use!"**. Re-using a product not only reduces its cost per use but creates less waste than a single use product.

The **ATM Securpak** is a unique combination of a re-usable bag, that is used to cover the ATM Cassette and a single use **Envomaxiseal** which is used to secure it. The **ATM Securpak** is designed to replace single use tamper evident envelopes, **creating less waste** and offering **cost saving benefits of up to 50%**.

How it Works

ATM Cassette is placed into the ATM Securpak.

Handle of ATM Cassette is lifted and flaps are folded over it.

Envomaxiseal is "clicked" into place to secure the bag.

Envomaxiseal is removed in a single piece.

ATM Cassette is removed and bag is ready to use again.

Benefits

- Re-usable time and time again creating less waste than single use products
- Cost savings of up to 50% can be achieved by implementing a re-usable system
- Envomaxiseal can not be removed without evidence of opening
- Base of ATM Securpak is cushioned to protect the ATM Cassette during transit
- Envomaxiseal can be printed with number, logo, text and barcode if required
