

Purge Bag

Re-usable Bag & Seal for ATM Replenishment

The market leader in the supply of tamper evident security products, ITW Envopak's philosophy is that **"Re-use is better than one use!"**. Re-using a product not only reduces its cost per use but creates less waste than a single use product.

The **Purge Bag** is a re-usable bag with a unique folding mechanism that is secured with a single use **Envomaxiseal**. Designed for the collection of items from the purge bin, the **Purge Bag** replaces single use tamper evident envelopes, **creating less waste** and offering **cost saving benefits of up to 50%**.

How it Works

Items are placed into Purge Bag.

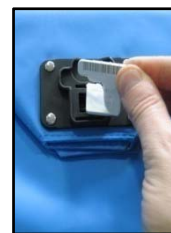

One flap is folded down.

Other flap is also folded down.

Top flap is folded down and seal "clicked" in.

Seal is removed in a single piece.

Contents are removed and bag is ready to re-use.

Benefits

- Re-usable time and time again creating less waste than single use products
- Cost savings of up to 50% can be achieved by implementing a re-usable system
- Envomaxiseal can not be removed without evidence of opening
- Purge Bag will not remain closed if the Envomaxiseal is not in place
- Envomaxiseal can be printed with number, logo, text and barcode if required
