

Tamper Evident Security Seals for Sacks

ITW Envopak is a division of Illinois Tool Works Inc (ITW). Operating in 48 countries with more than 50,000 employees, ITW provides us with the backing of a multi-billion dollar manufacturing organisation.

Supplying security sealing solutions since 1958, ITW Envopak has a reputation for flexibility and innovation and is regarded as one of the world's leading manufacturers of security seals.

METAL SEALS – a low cost indicative sealing solution for sacks

The **Clip Seal** is our lowest cost sealing solution and is easily applied by hand. Offering a higher level of security, the **Roll Tag** requires a closing tool to seal it. Both seals can be used with either wire or string and can be embossed with text or logo. These seals prove popular with those on a tight budget.

PLASTIC SEALS – the most popular sealing solution for sacks

Our extensive range of plastic pull-up seals provide you with the ideal solution for securing sacks. Available in a variety of lengths, the **Post Grip**, **Bank Grip** and **Bag Seal** all incorporate a label holder for affixing labels to. The **Omega XL**, with it's metal insert, and the **Slik Seal**, which is manufactured from nylon, provide the highest level of tamper evident protection. The **Superflag** is an un-numbered seal which incorporates a large flag for sticking a label over. All seals, except the **Superflag**, have a tear line for easy removal by hand.
