

Tamper Evident Security Seals for Vehicle Doors

ITW Envopak is a division of Illinois Tool Works Inc (ITW). Operating in 48 countries with more than 50,000 employees, ITW provides us with the backing of a multi-billion dollar manufacturing organisation.

Supplying security sealing solutions since 1958, ITW Envopak has a reputation for flexibility and innovation and is regarded as one of the world's leading manufacturers of security seals.

PLASTIC SEALS – fixed length & pull up seals

Plastic seals are used to provide tamper evident protection only. The **Posilok & Ring Seal** are both fixed length seals easily removed by hand. With its metal insert and no tear line version, the **Omega XL** provides the highest level of tamper evident protection. All seals can be barcoded for additional security and speed of data capture.

METAL, CABLE & BOLT SEALS – high security barrier seals

Envoseal manufacture an extensive range of barrier seals which are designed to give maximum protection for goods during transit. The **Posicheck & Banjo** are metal strip seals which are fixed in length. The **Padflex, Metflex & Envoflex** are cable seals which are variable in length and are designed to be pulled tight around the hasp. Maximum protection is provided by our **C-TPAT compliant Snapper** bolt seal.
